SUMMARY

I am a Web Developer in Seattle interested in solving problems and answering questions by leveraging data. I enjoy the process of bringing ideas to life, whether it's through a full stack web application or some other creative endeavor. Curiosity drives me to explore and continue to learn. I am at my best when working with a team to solve problems. As a former member of the package operations team at UPS I understand the necessity for collaborative decision making, accuracy, and timeliness.

PROJECTS

Square Fall

A simple browser game created with JavaScript and Firebase

Run Vision

Full stack web application that allows users to preview runs using Google Maps and share them with other users. It was created with JavaScript, Node.JS, Express, PostgreSQL, Sequelize, and Google Maps
